

BADGE PIT PRODUCT DATASHEET

Description

The Badge PIT (Personal Infrared Transmitter) operates as both a PIT and a standard ID badge holder.

The method of attachment should adhere to internal protocol. This is generally round the neck via an anti-ligature lanyard or on a belt at waist level using a clip.

The Badge PIT is operated by pressing the large rubber button on the reverse side to trigger its primary level of call. The battery status is checked by pressing the small button on the top left on the reverse side. A green LED will illuminate to indicate that the battery strength is sufficient or a red LED to show that the batteries need replaced. In cases where this button already has another function (for example Assistance in Twin Code PITs), the LED will illuminate regardless of which button is pressed.

The standard ID badge is inserted into the card slot at the front of the Badge PIT.

Caller ID is available with select units, meaning individual transmitters used to set off alarms can be traced.

The Transmitter is available in multiple versions with different coloured button inserts to signify the level of call/alert:

- | | |
|--------------------|---|
| Single Code | - Emergency (Blue) |
| Twin Code | - Emergency + Assistance (Orange) |
| Other | - Patient Call (Black) - Available with Caller ID |

Design

The design features a transparent blue tinted polycarbonate case as well as rubberised buttons for easy use in panic situations. The case incorporates an integrated Biomaster additive to inhibit the growth of a wide range of microbes, fungi and moulds over the entire lifespan of the product.

In addition, the Transmitter has a removable battery cover to allow the user to replace the batteries, when necessary, with ease.

Specification

P2 Badge PIT Product Codes

P2 Badge PIT Twin Code Emergency & Assistance	(Code: P2PITBADGE)
P2 Badge PIT Single Code Patient Call Only	(Code: P2PITBADGEPC)
P2 Badge PIT Single Code Emergency Only	(Code: P2PITBADGESC)

Physical Specification

Power Source:	Two 3.3V 2032 Button Cells
Biomaster:	Yes
Guarantee:	Each PIT has a one year guarantee

Physical Dimensions

(All dimensions in mm)
