

P2 FOBS

PRODUCT DATASHEET

Description

The P2 Fob is a light and unobtrusive device that is worn throughout a shift. Its discreet, lightweight design minimises disturbances to staff members. They are designed to be worn at all times for quick and easy arming, disarming, muting and resetting of the P2 Pinpoint System. When a relevant P2 Fob is presented to its associated unit it will activate or deactivate the function of the unit accordingly.

Key Features

The P2 Fobs can be programmed with differing control levels depending on the organisation's needs. For example, a Master Fob has maximum control across the System to minimise the need for additional fobs or keys, whereas an Arm/Disarm Fob will only work with a P2 Arm/Disarm Unit. All Fob variations are detailed under **Specification** in this Datasheet.

Design

All P2 Fobs are labelled with unique icons and clear text descriptions to indicate the fob's purpose. They are made from a lightweight, robust, epoxy resin.

Specification

P2 Fob Product Codes

P2 RFID Arm/Disarm Fob	(Code: P2FOBARMDIS)
P2 RFID Day/Night Fob	(Code: P2FOBDN)
P2 RFID Engineer Fobs	(Code: P2FOBENG)
P2 RFID Master Fob	(Code: P2FOBMAS)
P2 RFID Mute Fob	(Code: P2FOBMU)
P2 RFID Assistance Reset Fob	(Code: P2FOBRESA)
P2 RFID Emergency Reset Fob	(Code: P2FOBRESE)
P2 RFID Local Reset Fob	(Code: P2FOBRESLOCAL)
P2 RFID Master Reset Fob	(Code: P2FOBRESMAS)
P2 RFID Patient Call Reset Fob	(Code: P2FOBRESPC)

P2 PIT Physical Specifications

Material:	Epoxy Resin
Size:	45mm x 30mm x 1.6mm
Weight:	2.8g

Physical Dimensions

(All dimensions in mm)
